

Beat the Texas Heat

Who's at Risk?

Older adults, young children, people with certain medical conditions, outside workers, and people without AC are at greater risk for heat-related illness

Stay Hydrated

Drink at least 90 oz of water! You may be at greater risk of dehydration if you take certain medications. Ask your doctor if you may be at risk

Utility Assistance

Scan to access applications for utility assistance

Cooling Centers

Scan to see map of public spaces with AC.
